Yarding Change 4456
-3193

comparison date 07/02/2017

The recent onset of extreme hot weather has restricted the movement of stock, with numbers reducing significantly by 42%. Overall quality of the yearling steers was below the standard of the previous week. A fair panel of buyers were in attendance with several restockers looking on with intention. Prices reduced by a further 10c to 12c/kg on the yearling steers however a large part of this reduction was a direct result of the quality presented. Despite the seasonal outlook, light weight yearling heifers were in demand and regained some of the previous week's losses. A small sample of heavy grown steers experienced very little change however all classes of cows continued to lose ground by a further 9c to 20c/kg.

A small sample of steer calves returned to the paddock at 401c with some to 410c/kg. Light weight yearling steers returning to the paddock made to 400c with a large sample averaging 373c/kg. Medium weight yearling steers to feed made to 360c, to average 348c/kg. Heavy weight yearling steers over 400kg to feed made to 342.2c with most in the low 330c/kg range. Light weight yearling heifers to restockers made to 352c, with a large sample averaging 341c/kg. Medium weight yearling heifers to feed averaged 315c and made to 333c/kg.

Heavy grown steers to export slaughter made to 302c, to average 301c/kg. Medium weight 2 score cows averaged 206c and made to 220c/kg. Good heavy cows made to the very occasional 248c, with most close to 239c/kg. Heavy bulls made to 261c/kg.
