WELCOME

Welcome to our annual on Property Sale 2024

ALL ABOUT HERFORD ~ ALL ABOUT BEEF

This year, we are offering 55 young sires; 37 of which are PP (Homozygous Polled) and backed by high-ranking performance data and sound phenotype for longevity to suit all aspects of the industry. In the last number of years, we have embraced technology and now we are seeing the fruits of our labour whilst not forgetting those phenotypical and physical traits that we have always valued.

1. Conformation
2. Fertility & mothering ability
3. Temperament
4. Eye pigment & setting
5. Skin & hair
6. Doing ability

It has been relieving to see the cattle market be on an uptrend, especially considering where we were this time last Spring! Pushed further with the seasonal outlook also looking promising for large parts of NSW and QLD. We hope that Southern parts of Australia soon have a break in the weather, to continue to support their enterprises. Many experts believe that by December 2024 that the cattle market may reach the dizzy heights experienced not so long ago. Certainly, an encouraging notion.

Hereford genetics continually express their value across a number of programs and markets across Australia. Herefords are and will continue to be a successful base for any crossbreeding enterprise, whether it be over Angus females in southern parts of Australia or in more tropical based herds, located in the North of Australia. Recent studies into "black baldy" females equate to an increase in fertility (7% higher pregnancy testing rates) and increased profitability with an approximate ~\$30 per head, feedlot environment (Harris Ranch, 2024). Recent studies in Australia have proven that Hereford sired calves at weaning were 9% heavier than their pure-bred angus counterparts. It is imperative that as a Hereford Stud, we continue to provide quality, pure bred Hereford bulls; as to allow for the hybrid vigour benefits.

Over the last few years we "Remolea" are noticing consistent growth in Queensland, pushing into central Queensland, for our bulls to be used over Bos Indicus cattle (e.g. Brahmans/ Droughtmaster female). The Hereford advantage on application is the ability to target MSA markets over the hook. As well as substantial fertility and heterosis gains.

Whilst not forsaking the basics of calving ease, fertility, growth and milk, this catalogue of bulls are:

- * 66% above breed average for IMF and
- * A number of bulls are double the breed average for IMF
- * Large percentage above breed average for EMA and
- * 80% above breed average for scrotal

The O'Leary family would like to thank Mark Duthie and GDL Dalby for handling the sale and the friendship and service throughout the year.

We at Remolea would like to wish you the best with your purchase and thank you for your interest and competition.

*H M O'Leary

SALE INFORMATION

GST: GST is to be added to the purchase price at the fall of the auctioneer's hammer. You will be invoiced the purchase price plus GST.

REBATE:

- A rebate of 5% will be paid to all agents who attend the sale with or on behalf of their client(s) and settle within 7 days of date of invoice.
- A rebate of 1% will be paid to all agents who do not attend the sale but introduce clients and settle within 7 days of date of invoice.
- **Introductions must be in writing, email or fax and can be sent to the vendors or mduthie@grantdaniellong.com.au at least 12 hours prior to the sale.**

INSPECTION: Bulls may be inspected prior to the Sale by contacting vendors or selling agents or on the morning of sale day.

HEALTH: All bulls have been vaccinated with 7 in 1, 3 Germ Blood, BEF vaccine (3day sickness), Pestigard and Vibrovax. Drenched with Commodus injectable. Tested free of Pestivirus and genetic diseases. Verified to sire. Semen and Morphology tested.

INSURANCE: There is no Vendor Insurance on Sale Bulls. It will be the responsibility of the purchasers to insure their bulls. Representatives from Insurance Companies will be at the sale and can offer insurance terms on sale bulls.

SALE VENUE: Sale venue as per map on back page is located 48 klms north west of Warwick and 64 klms south of Toowoomba.

REFRESHMENTS: Refreshments will be available on sale day.

GUARANTEE: All bulls have been semen and morphology tested and will be sold as fertile and capable of natural service at the time of sale. In the unlikely event of infertility due to reasons other than injury, disease or misadventure, the vendors will, upon the production of a mutually agreed veterinary certificate, at the purchasers expense and within six months of the date of purchase and return of the bull, issue the purchaser with a credit note equal to the price of the bull in the vendors future sales.

ACCOMMODATION:

- **Royal Hotel Leyburn** (07) 4695 0129 located 21kms from Remolea;
- **Clifton Arms Hotel** (07) 4697 3154 located 23kms from Remolea;
- **Pittsworth Motor Inn** (07) 4693 2888 located 42kms from Remolea;
- along with a wide array of accommodation in Warwick (located 48kms from Remolea) & Toowoomba (located 60kms from Remolea).

Can't make the sale?

Purchase online in eight simple steps!

UNDERSTANDING EBVs

... a brief guide to breedplan

The following is a brief description of GROUP BREEDPLAN EBVs and Accuracies. GROUP BREEDPLAN is an advanced genetic evaluation system that provides a genetic description of cattle for a range of traits influencing fertility, growth and carcass performance. It provides predictions of the genetic merit of individual animals called Estimated Breeding Values (EBVs). EBVs are based on all available pedigree and performance records provided by breeders in Australia and New Zealand, along with available overseas genetic information. EBVs are expressed in the units of measurement for each particular trait, and are shown as +ive or -ive differences from the breed base. The average EBV for different traits changes over time as the breed makes genetic progress. The averages for calves born in 2015 are shown below. These averages provide a useful benchmark for comparisons of EBVs for individual animals.

ACCURACY (%) ~ Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal (or it's progeny, or relatives) then the accuracy of it's EBVs for particular traits will increase. **CALVING EASE DIR (%)** ~ Estimates of the genetic differences between animals in the ability of their calves from 2 year old heifers to be delivered without assistance. **CALVING EASE DTRS (%)** ~ Estimates of the genetic differences between animals in the ability of their 2 year old daughters to calve without assistance. **GESTATION LENGTH (DAYS)** ~ Estimates of the genetic differences between animals in the number of days from the date of conception to the calf birth date. **BIRTH WT (KG)** ~ Estimates of the genetic differences between animals in calf birth weight. **200-DAY WT (KG)** ~ Estimates of the genetic differences between animals in liveweight at 200 days of age. **400-DAY WT (KG)** ~ Estimates of the genetic differences between animals in liveweight at 400 days of age. **600-DAY WT (KG)** ~ Estimates of the genetic differences between animals in liveweight at 600 days of age. **MATURE COW WEIGHT (KG)** ~ Estimates of the genetic differences between animals in cow weight at 5 years of age. **MILK (KG)** ~ Estimates of the genetic differences between animals in milk production, expressed as variation in 200- day weight of daughter's calves. **SCROTAL SIZE (CM)** ~ Estimates of the genetic differences between animals in scrotal circumference at 400 days of age. **DAYS TO CALVING** ~ Estimates of the genetic differences in female fertility, expressed as the number of days from the start of the joining period until subsequent calving. **CARCASS WEIGHT (KG)** ~ Estimates of the genetic differences between animals in carcass weight, adjusted to 650 days of age. **EYE MUSCLE AREA (CM2)** ~ Estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site, in a 300kg carcass. **RIB FAT (MM)** ~ Estimates of the genetic differences between animals in fat depth at the 12/13th rib site, in a 300 kg carcass. **RUMP FAT (MM)** ~ Estimates of the genetic differences between animals in fat depth at the P8 rump site, in a 300kg carcass. **RETAIL BEEF YIELD % (RBY%)** ~ Estimates of the genetic differences between animals in percentage retail beef yield, in a 300kg carcass. **INTRA-MUSCULAR FAT % (IMF%)** ~ Estimates of the genetic differences between animals in percentage intramuscular fat (marbling) at the 12/13th rib site, in a 300 kg carcass.

Note: BREEDPLAN Figures cannot be compared between breeds, ie between Angus and Hereford/Poll Hereford. Breed Average EBVs for the 2022 Born Calves.

Breed Average EBVs for the 2022 born calves

DISCLAIMER & DELIVERY TIPS

DISCLAIMER: The owners, employees, sale staff and representatives accept no liability for accidents that occur, although these are rare at cattle sales, any person attending does so at their own risk, While all care has been taken in the preparation of this sale catalogue, the vendors accept no responsibility for any errors or omissions contained in this publication.

LANDING YOUR BULL HOME: The most important part of your new bull's future on your property is his arrival home. A couple of important things are:-

- 1) Ask your carrier to use electric prodders responsibly.
- 2) If possible have some females in the yard and keep them and the bulls in overnight. Preferably with some hay.
- 3) If females are unavailable and if time permits hold the bulls in the yard for a few days until the bull seems to be used to their new surroundings.

HornPoll

Understanding the horn / poll status of a bull is a very important aspect when determining whether a potential new bull meets your breeding objectives.

Genotype	Status	Explanation
PP Homozygous Polled	Polled	This animal possesses two copies of the poll variant of the gene. This animal is highly likely to express a polled phenotype and should always pass a poll variant to its progeny.
PH Heterozygous Polled	Carrier	This animal carries one copy of the poll variant and one copy of the horn variant of the gene. This animal is highly likely to express a polled or scurred phenotype and will transmit either the horn or poll variant to its progeny.
HH Homozygous Horned	Horned	This animal carries two copies of the horn variant of the gene. This animal is highly likely to be horned and will always transmit the horn variant to its progeny.

REFERENCE SIREs

CALLAWAY WRL HS MEGATRON M004 (AI) (TW) (PP)

Megatron was purchased in 2017, as a yearling. Megatron is sired by the well performed sire, Matariki Holy-Smoke, out of a top female with volume and style. Megatron is a high indexing sire with moderate birth, high growth, calving ease and IMF ranked in the top 10% of the breed. Megatron is breeding true to type and having a huge impact on our breeding program. Megatron sons have sold to heights of previous sales; including, Remolea Rochester R084, sold to B & C Anderson Clermont for \$26,000 in 2022; Remolea Quicksilver Q092 sold for \$22,000 in 2021 to the Bruggemann Family Trust, Taroom.

WIRRUNA LEDGER L285 (AI) (PP)

Ledger was purchased in 2020 as an aged Sire, from Terraneil Poll Herefords of Western Australia. He is trait leader for 200 day, 400 day, Scrotal Size and EMA. Ledger is a proven sire who has been widely used across Australia and New Zealand. Ledger is a bull with impeccable structural soundness, with many that have seen him describing him with perfect feet. He breeds cattle with extra shape and thickness. Ledger sons have sold at Remolea to a top of \$15,000; Remolea Superior S051 sold to the Bruggemann Family Trust.

TOBRUK QUINN Q006 (AI) (PP)

A son of the Herefords Australia Super Sire Wirruna Matty, Quinn is a high indexing calving ease sire with muscle shape and softness. Used over heifers, Quinn ranks in the top 1% of the breed for IMF and top 5% of the breed for all \$ indexes.

Quinn has grown into an impressive sire, displaying length of body, roundness and a strong head and eye.

Quinn's first run of sons sold in 2023; including Remolea Salvatore S089 selling to Quairading Poll Herefords, WA.

REFERENCE SIREs

DALKEITH NIPPER N082 (P)

Nipper is a sire with a lot of power and performance. Nipper has exceptional length and volume, muscle and has a terrific skin and hair type. Nipper has an exceptional set of data, combining carcass, growth and fertility. Nipper ranks in the top 1% of the breed for all dollar indexes. Another feature of the Nipper progeny is the terrific disposition they display. A Nipper son, Remolea Scone S169 topped the 2023 sale selling for \$21,000, purchased by YavenVale Herefords.

RUSLYNN JACK FLASH J49 (P)

Jack Flash was purchased in 2015. Jack Flash has been used over heifers very successfully. They are easy calvers, with a good growth pattern. J49 is in the top 10% of the breed for calving ease and a trait leader for scrotal size along with shorter Days to Calving. Sons have sold to a top of \$18,000 Remolea Quest Q081 to E Bailey and Co, Miles. Another son Remolea Matador M014, topped our 2018 sale, selling to Montgomery Pastoral Co. Last run of Jack Flash sons to be offered within the 2024 bull sale.

YAVENVALE NOCKOUT N312 (AI) (PP)

Nockout is a rare and special, curve bending sire. He has an exceptional spread of data consisting of top 5% calving ease, gestation length, 400, and 600 day weight. He also drops back to below average for Mature Cow Weight. This means Nockout breeds cattle with high growth, yet moderate and low maintenance for easy keeping females. Nockout also boasts high milk, scrotal and top 1% IMF. Nockout is breeding very consistently across Australia and New Zealand. A bull that adds value and profitability to modern and progressive beef herds. *First sons sold at Yavenvale in 2022 for a top of \$28,000 with an average of \$15,000 and a maternal brother making \$74,000.*

We believe behind every great bull is a powerful cow. For this reason, we have invested in 2 sons of the YavenVale Duchess P300 cow. Top Notch combines phenotype and performance. He is as thick as they come and has fine, sleek skin with well hooded eyes; providing optimal suitability to the QLD climate. He offers explosive growth, Top 1% 200-and-400-day weight, Top 3% EMA, Top 10% Retail Feed Yield and Top 5% IMF and all \$ indexes. T488 was purchased in partnership with Newcomen Herefords.

As tradition will follow; we like to end the sale with a good bull and this year is certainly no exception! Admire the softness, easy doing ability and good skin & hair type of T197. Trick has a well-balanced set of EBVs; high calving ease, short gestation and above average milk, growth and scrotal.

Lot 55 REMOLEA TRICK T197 (P)

ADDING VALUE TO THE NORTHERN BEEF INDUSTRY

304 O'Leary Road | Ellangowan (via Clifton) Qld 4361

Remolea is located 48 kms down the Condamine River from Warwick, 24 kms west of Clifton and 64 kms south of Toowoomba. Established in 1962, our aim has always been to breed soft easy doing cattle. We place great emphasis on functional, fertile cattle, as they are run under commercial conditions. Temperament, skin, hair colour & quality are high on our priorities. We have also endeavoured to breed an even line of cattle (bulls) rather than individuals.

Thank you for supporting the 2024 Annual Bull Sale
