SALE CATALOGUE DISCLAIMER

All reasonable care has been taken by the vendor and designer to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor, selling agents and designer make no other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in the catalogue.

HP Wagyu

HP Wagyu is a Fullblood and Poll wagyu operation that has invested heavily to build a foundation of the best performance outlier genetics from superior wagyu herds.

These genetics have gone on to build a prestigious Fullblood herd based on industry leading bloodlines from the ground up that supplies our commercial wagyu operation seedstock. The commercial wagyu operation feeds a larger amount of data back so we can make profitable and informed breeding decision and continue to improve our herds.

We have a goal to produce wagyus with balanced traits, from maternal to carcass, an animal that does it all from F1 to Fullblood.

We are proud to be a part of the Marble High Wagyu Sale offering some of our best genetic from the heart of our herd.

Sahara Park Wagyu

We are the proud breeders of the sire of the Grand Champion and Class 1 Fullblood Champion at the Wagyu Branded Beef Competition in 2023, SPWFPP6.

Sahara Park Wagyu is a family owned and operated fullblood and poll Wagyu stud, located north west of Rockhampton, Central Queensland.

Dean & Sam Pollard with their daughter Hannah run approximately 500 registered fullblood and poll wagyu females, consistently using AI, ET, IVF and natural mating to increase herd quality.

through carcass data. We have a goal to produce Wagyu cattle that have exceptional marbling and marble fineness, large ribeye areas and target a carcass weight of 450kg.

We are excited to be a part of the Marble High Wagyu Sale and are proud to be offering some of our most elite genetics.

As breeders we endeavor to maintain high quality seedstock animals, semen and embryos made available for both the Australian and international markets utilizing the latest genetics discovered

Arubial Wagyu

Arubial Wagyu, a family owned and registered fullblood Wagyu herd, operates alongside integrated feedlot and farming enterprises.

Committed to objective measurement and full transparency, we excel in data collection and reporting, equipping our clients with accurate information for informed breeding decisions.

Additionally, through our GrowSafe facility, Arubial has submitted three sets of data to BreedPlan which will contribute to the Nett Feed Efficiency traits being enhanced going forward.

As active feedlot owners, we are deeply integrated into the global supply chain, allowing us to gather data on over 100 fullblood carcasses per month, all graded by AusMeat. Our ongoing carcass submissions reveal a distinct linear correlation between EBVs and raw carcass data, reinforcing our confidence in the Breedplan numbers.

At Arubial Wagyu, we focus on essential traits including maternal, fertility, marbling, and the Breeder Feeder Index.

The animals offered today are meticulously chosen from our 3500-strong fullblood cow herd, offering a selection of genetics that represent the pinnacle of Arubial bloodlines.

Macquarie Wagyu

Macquarie Wagyu follows a mantra of breeding backed by performance data.

Situated on the Darling Downs, Queensland, we are a specialist Wagyu Breeding, Backgrounding, Feedlot and Farming operation and our vertical integration allows us to measure whole of life performance. All live and carcass data is submitted to the AWA and Breedplan.

At the same time we endeavor to maintain diversity of bloodlines.

Performance data drives our operation so that you can have confidence when investing in Macquarie Wagyu genetics.

We join around 700 registered females annually through ET, IVF, AI and natural mating.

We don't just follow the trends, we prove our breeding selections in the feedlot and this drives our lot selections for this exclusive genetics sale.

Macquarie Wagyu

CONDITIONS OF SALE

The sale will be conducted by The Agents under the ALPA Terms and Conditions as printed in the back of this catalogue. The following are Special Conditions applied by the Australian Wagyu Association (AWA) to generate a high level of quality assurance.

SALE REGULATIONS

The Marble High Wagyu Sale Vendors offer Lots under the following conditions:

1. All live Lots and sires are AWA registered as Fullbloods or Purebred Polled

2. **BREEDPLAN** - Data published in the sale catalogue is current at the time of printing. Latest data is in the online catalogue.

3. **BREEDING SOUNDNESS & GUARANTEES OF FERTILITY** - All bulls offered for sale have passed a semen fertility test by a registered veterinary surgeon and a semen evaluation certificate will be available.

GUARANTEES OF FERTILITY

BULLS: All bulls are guaranteed breeders and to so prove within six months of the date of sale or by reaching the age of 24 months whichever date shall be later.

FEMALES: All females are guaranteed to go in calf within six months of the date of sale or by the age of 30 months whichever date shall be later. A positive pregnancy test certified by a qualified veterinary surgeon shall be sufficient evidence that the animal is in calf.

CLAIMS: Claims under the above guarantees of fertility must be made to the vendor within six months from the date of sale and prior to the animal entering a quarantine area other than on the vendor's property.

- Claims must be accompanied by a veterinary certificate which must clearly identify the basis of the claim.
- Infertility resulting from injury or disease occurring after the sale of the animal will not be covered by this guarantee.
- The vendor retains the right to have the animal placed on a property nominated by the vendor or returned to the vendor's property for further assessment of fertility for a period not exceeding six months. In the event of the animal being proven fertile within the period, the costs incurred shall be borne by the purchaser. In the event of the animal not being proven fertile within the period the costs incurred shall be borne by the vendor.

LIABILITY OF A VENDOR: Except for costs defined elsewhere in the conditions of sale, the liability of a vendor in respect to claims relating to fertility shall not exceed the purchase price of the animal(s) or provide mutually agreed upon replacement animals.

REFUNDS: In the event of a claim being substantiated and the purchase price being refunded, the animal(s) shall automatically become the property of the vendor and be returned to the vendor or be disposed of according to vendor instructions at vendor's expense.

This guarantee is voided automatically if the animal is returned to the vendor in poor physical condition or with any injury as determined in the sole discretion of the vendor acting reasonably, or if tests carried out on behalf of the vendor within 14 days of return proved positive to any diseases which may affect the animals fertility or ability to breed naturally, or the purchaser admits that it has or the vendor forms the view acting reasonably that the purchaser has collected and stored semen from a bull or has performed super ovulation or flushed a female.

- In the event of a dispute as to whether a lot is a breeder, such dispute shall be resolved by the vendor and the purchaser and the auctioneer. While the auctioneer will use their best endeavours to assist, shall have no liability or responsibility in that regard. In the event that a lot is alleged or proved to be a breeder the purchaser shall nevertheless be obliged to pay the auctioneer the full price and any other monies or interest payable by the purchaser in accordance with these terms and conditions.

4. PRE-SALE INSPECTIONS

Bulls – The Arubial bulls are located at Lillyvale, Condamine, Qld. Contact Laird Morgan on 0428 281190 to make appointment. The Macquarie bulls are located at Broadwater Downs, Leyburn, Qld. Contact Anthony Winter on 0400337472 to make an appointment. Both Arubial and Macquarie welcome inspections on the day prior to the sale, Tuesday 16th August from 9.00am to 4.00pm. Please register your interest early with Harvey at GDL 0414 941788. Depending on numbers there may be a bus arranged

from The Burke and Wills Hotel, Toowoomba to Macquarie and return. Protocols will apply at both properties.

Heifers - The 17 heifers are all in quarantine at TLG, Camperdown, Vic. Due to strict quarantine regulations there will only be one opportunity to inspect them on Friday 12th August from 10.00 am to 3.00pm. Please contact TLG prior to confirm your attendance on 03 55932016.

Semen Sires – there are five young semen sires in quarantine at TLG: MYMFS0373, MYMFR0738, MYMFR0734, ADBFR0152, ADBFR0448. These bulls are located in another area at TLG and can also be inspected on the same day, Friday 12th August. Please contact TLG to book your inspection.

5. **SEMEN** - Storage of semen in Australia is at Rocky Repro and TLG. Storage in USA is at Brushy Creek, Texas. Please refer to lot descriptions of each lot.

6. **GENETIC CONDITIONS** - Results of DNA testing for specific genetic conditions appear in this catalogue which indicate the lots status and whether it is DNA tested free or 'free by pedigree' of B3, CHS, CL16, and F11.

7. **BIDDING** - the sale will be a live auction with an online interface through Elite Livestock Auctions allowing appropriately registered potential buyers worldwide to bid. First time online bidders should register with elitelivestockauctions.com.au early at least by the day before the sale. Buyers attending the sale will need to register with the Agents prior to the sale.

8. **INSURANCE** - ownership of a Lot changes to the Buyer at the fall of the hammer. Insurance is recommended and will be available at the sale.

9. **EXPORT PROTOCOL** - availability of Lots to International countries is indicated in the catalogue and those buyers should check with authorities to ensure access to their purchases.

10. **TRANSFERS** – the Vendors will transfer the ownership of live Lots to the new owners at no cost to the Buyer.

11. **FREIGHT AND DELIVERY AFTER SALE** - All live animals are at the vendors` property or at TLG as indicated in the catalogue. Genetic material is stored at registered premises as indicated in the catalogue.

Freight is the Buyers` responsibility to arrange and pay for. The contacts of the vendor and semen storage centres are as indicated in the catalogue. Delivery will not be approved until the Buyer has paid in full.

12. **GST** - The sale will be conducted on a GST exclusive basis and GST of 10% will be added to the sale price on the invoice.

13. **RISK & LIABILITY RELEASE** -

- Any person attending the sale does so at his/her own risk.
- All persons attending the sale release the vendors and agents from all actions or demands due do any loss, death, damage or injury occurring on the premises.
- The vendors or agents are not responsible and have no liability for any death or injury to any person or any loss of or damaged to the person attending the Sale, their property or otherwise.

14. **HOW TO BID** - Registered bidders can bid live by attending the auction or bid online through elitelivestockauctions.com.au or by telephone via a nominated agent/ third party approved by the Agents.

15. **BIDDING VARIATIONS (PER LOT OR PER ITEM)**

Lots and will be offered for sale in the following manner:

Live cattle - bidding is per Lot

Semen - bidding is per straw

16. **HEALTH STATUS & TREATMENTS** - The Vendors have completed a Vendor Declaration form and this form is available for perusal on www.elitelivestockauctions.com.au

17. **ACCOMODATION** - the auction is being conducted live at Burke and Wills Hotel, 554 Ruthven Street, Toowoomba, Qld. The Vendors will be staying at the hotel on the night of the sale and welcome others to join them. Call 07 46322433 to book your accommodation or view burkeandwillshotel.com.au

EBVs

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These are called Estimated Breeding Values (EBVs). The EBV is, therefore, the best estimate of an animal's genetic merit for that trait. EBVs are expressed as the difference between an individual animal's genetics and the genetic base to which the animal is compared.

ACCURACY

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy, the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

- Less than 50% = Low accuracy and should be considered a preliminary estimate. The EBV could change substantially as more performance information becomes available.
- 50 – 74% = Medium accuracy, usually based on the animal's own records and pedigree. n 75 – 90% = Medium-high accuracy and usually includes some progeny information.
- Becoming a more reliable indicator of the animal's value as a parent. n 90% and above = High accuracy.

BIRTH

GL: Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to lighter birth weights and easier calving.

BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers calving at 2 years of age.

GROWTH

200: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-Day weight of their calves. **200: 200-Day Growth EBV (kg)** is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days, and dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, ad-

justed to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

FERTILITY

SS: Scrotal Size EBV (cm) is an indicator of male fertility in regard to semen quality and quantity in Western cattle breeds. Higher (positive) EBVs indicate higher fertility. There is also a favourable genetic relationship with age of puberty in female progeny. The relationship between scrotal size and fertility in Wagyu is assumed, but not proven.

CARCASE

Carcase Weight EBV (kg) is based on abattoir carcass records and live weight measurements (particularly at 600-Day weight) and is an indicator of the genetic differences in carcass weight at the industry average slaughter age of 990 days. Larger positive values are more favourable.

EMA: The EMA EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 420kg dressed carcass. More positive EBVs indicates larger eye muscle area and higher retail beef yields. Ultrasound, Aus-Meat and Japanese Digital Image Camera measurements contribute to this EBV.

Rump Fat: The Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 420kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV: The Retail Beef Yield Percent EBV (%) estimates the genetic differences in total (boned out) meat yield as a percentage of a 420kg dressed carcass. A more positive EBV indicates higher percentage yield for the 420kg carcass weight.

Marble Score EBV: The Aus-Meat Marble Score is an estimate of the genetic difference in the Marble Score in a 420kg carcass. Marble Score EBVs utilise the Aus-Meat Marble Score scale of 1 to 10, where 10 is equivalent to 9+. Where results from the Japanese Digital Image Camera are available, marbling percentage and fineness are also used to calculate Marble Score EBVs. Larger positive values are more favourable.

Marble Fineness EBV: (Marbling Fineness Index) estimates the genetic differences in the Marbling Fineness Index (degree of fleck of marbling fat) as measured by the Japanese Digital Image Camera. A more positive EBV indicates higher levels of marbling fineness.

HOW TO REGISTER with

STOCKLIVE ELITE

Follow these easy steps to start bidding:

Visit www.stocklive.com.au using your desktop, laptop, iPad, iPhone or Android device. NO App required.

Select the **bid** icon beside the sale you wish to bid on.

If you're new, select **register**, and complete the form with all your details, **accept sale conditions**, select **create bidder registration**.

You will receive an email from StockLive. Select "**Confirm my bidding account**" to set your password and **accept Bidder Account Terms & Conditions** and Privacy Policy followed by **create my account**.

Congratulations! Your StockLive account has been created and your bid request is pending. You will be notified via email when your request to bid has been approved.

Existing users, follow steps 1 & 2, select login, enter your details followed by the **request to bid** icon beside the sale you wish to bid on and then **accept** the terms.

On Sale Day, follow steps 1 & 2, select **enter auction** to watch, listen and purchase when the sale is flashing **LIVE**.

Invoicing and delivery will be carried out as per your registration details by the respective Selling Agents.

BDWF23U0472 represents the pinnacle of what Macquarie Wagyu is breeding for. Proven genetics, excellent conformation and temperament, high EBVs and free from all recessive conditions. She is sired by G113 and out of a Y408 cow with progeny carcass data averaging DMS 9.5 on MIJ camera.

Her EBVs are exceptional – top 1% for all indices and marble fineness plus top 5% for marbling and carcass weight. Combined with her high growth, EMA and gestation length EBVs she presents as a very well balanced young female.

We have great confidence in this breeding as G113 daughters average 9.7 DMS on MIJ camera for their own progeny carcass data. With her pedigree, performance data and EBVs this heifer is a standout.

U1858, a three-quarter maternal sister to the emerging super sire U1945, is a standout choice for any Wagyu herd due to her exceptional balance of traits. She ranks in the top 1% for Marble Score (MS), marble fineness, SRI, FBTI, F1TI, and BFI.

Her impressive profile includes low gestation length, positive milk production, and high marbling, making it extremely difficult for Arubial to part with. U1858 represents the pinnacle of excellence in female Wagyu genetics.

Currently in quarantine in Queensland, U1858 is qualified to collect embryos for export to Canada and America. This lot also sells with 2 straws of semen from Arubial Symphony S1007, the highest-ranked living bull in the breed for SRI, this semen may be used on any female.

BDWF23U0465 is the first BDWFQ0291 heifer we have offered for sale at auction. She is in the top 1% EBVs for all indices, marble score and marbled fineness plus her well above average EBVs for growth, carcass weight and EMA will complement any breeding program. Sired by emerging superstar BDWFQ0291 whose progeny are averaging above 11 DMS on MIJ camera, her dam BDWFE2344 has progeny averaging 9.6 DMS on MIJ camera.

She is free from all recessive disorders and displays the quiet nature and excellent confirmation we have come to expect from animals with G113 breeding in the pedigree.

A heifer with a very, very unique line-bred pedigree on both the top and bottom side, U1994 is an extremely sweet Bond heifer with plenty of growth, out of Arubial R727 who is, to be honest, a mistake breeding but is breeding very consistently. Interestingly, the inbreeding coefficient in this heifer is only 7%.

Arubial retains a full brother to U1994. She sits in the top 1% of the breed for MS, marble fineness, SRI, FBTI, F1TI, and BFI.

Currently in quarantine in Queensland, U1994 is qualified to collect embryos for export to Canada and America.

This lot also sells with 2 straws of semen from Arubial Symphony S1007, the highest-ranked living bull in the breed for SRI, this semen may be used on any female.

As an outstanding growth daughter of United, U0133 benefits from the impressive genetic performance of her sire. United has now had 62 carcasses submitted to BreedPlan. Our analysis of 33 carcasses using the MiJ camera shows United with an impressive digital Marble Score average of +10.5 and a carcass weight average of 507kg. These results surpass the average kill values of MS +9.4 and an average carcass weight of 449kg.

Additionally, U133's dam sire, LFDN0166, demonstrates excellent results from six carcasses with a digital Marble Score average of +10.48 and a carcass weight of 414kg. U133's combination of top-tier genetics and proven performance makes her a valuable asset for any herd. Currently in quarantine in Queensland, U133 is qualified to collect embryos for export to Canada and America.

This lot also sells with 2 straws of semen from Arubial Symphony S1007, the highest-ranked living bull in the breed for SRI, this semen may be used on any female.

A sweet, high growth heifer by the first season sire, Arubial Regal R738, U2010 sits in the top 1% of the breed for SRI, and top 5% for MS, marble fineness, FBTI, FITI and BFI.

Currently in quarantine in Queensland, U2010 is qualified to collect embryos for export to Canada and America.

This lot also sells with 2 straws of semen from Arubial Symphony S1007, the highest-ranked living bull in the breed for SRI, this semen may be used on any female.

A opportunity to purchase leading HP Wagyu performance and outcross genetics. U0339 is the only daughter ever offered out of our leading dam Mayura L0082, it was a very hard decision as all of our L0082 progeny have been keepers. L0082 is the mother of HP Wagyu Sanjinami Doi P0100 and HP Wagyu Reliable R157. Sanjinami Doi topped our progeny test earlier in the year for the highest marbling sire in the group. Reliable semen has sold to \$16,000/straw and his progeny are exceptional.

U0339 is also sired by Trent Bridge Wagyu's outlier sire J77. J77 has incredible carcass data and is a proven Australian sire with no TF148. J77 produces great phenotype progeny along with heavy carcass weights, he is a profit driving sire. To top this world class lot off she has been Aïed to our highly anticipated young sire Katana HPEF23U0288 and then mopped up by another young up and coming balanced outcross young sire Shinken HPEF23U0301.

We are excited to lead the 2024 Marble High Sale bull line up with U350, a standout son of Q2134 from the renowned Mayura herd in SA. Q2134 was selected for his exceptional pedigree, at the time of his acquisition, his mother's carcass data averaged a remarkable 9.3 for Marble Score (MS) and 431kg for carcass weight from three carcasses. As more data is collected, Q2134's numbers continue to impress.

U350 ranks in the top 1% for Eye Muscle Area (EMA), Marble Score (MS), F1TI, and BFI. His well-balanced traits make him an outstanding choice for any seedstock producer. Noteworthy attributes include +3 for milk, +42 for carcass weight, +13.1 for EMA, and +3.2 for marbling. Additionally, U350's dam sire, MYMFP0025, has demonstrated exceptional performance with an average MS of +10.62 from 22 digital carcasses and a carcass weight of 476kg. U350 has been through the GrowSafe installed at Arubial; please refer to the supplementary sheet for results.

U137 boasts the top 1% of the breed for gestation length, MS, marble fineness, SRI, FBTI, F1TI and BFI.

As an outstanding son of United, U135 benefits from the impressive genetic performance of his sire. United has now had 62 carcasses submitted to BreedPlan. Our analysis of 33 carcasses using the MiJ camera shows United with an impressive digital Marble Score average of +10.5 and a carcass weight average of 507kg. These results surpass the average kill values of MS +9.4 and an average carcass weight of 449kg.

Additionally, U135's dam sire, LFDN0166, demonstrates excellent results from six carcasses with a digital Marble Score average of +10.48 and a carcass weight of 414kg. U135's combination of top-tier genetics and proven performance makes him a valuable asset for any herd. U137 will suit FB/PB and F1 production. He is a full brother to Lots 7, 16 and 19.

U102 is another outstanding United son suited for seedstock production. With a great balance of numbers, he sits in the top 1% for MS, marble fineness, SRI, FBI, F1I and BFI.

As a son of United, U135 benefits from the impressive genetic performance of his sire. United has now had 62 carcasses submitted to BreedPlan. Our analysis of 33 carcasses using the MiJ camera shows United with an impressive digital Marble Score average of +10.5 and a carcass weight average of 507kg. These results surpass the average kill values of MS +9.4 and an average carcass weight of 449kg.

Additionally, U135's dam sire, LFDN0166, demonstrates excellent results from six carcasses with a digital Marble Score average of +10.48 and a carcass weight of 414kg. U135's combination of top-tier genetics and proven performance makes him a valuable asset for any herd.

HERE HE IS!! The bull everyone has been asking us about and finally we release his first genetics in this years Marble High Sale. Katana is sired by the the legendary Mayura Notorious, Notorious has become a super star with his incredible fine marbling and eye muscle area. He has produced the most magnificent carcasses but the most noted is the branded beef competition taking out the top gong in 2022 with an unbelievable 61% IMF 145cm² EMA and in this years 2024 with a 60% IMF and a massive 155cm² EMA. Katana is the highest genomic BFI progeny of Notorious in the world with a incredible balanced set of GEBV's. His dam HP Wagyu P0128 is sired by our legendary Mayura L0010 which is known for producing great females that milk and on the very bottom side goes back to a 100% Takeda embryo daughter which includes TF146 in her pedigree.

Arubial U1945, stands as the highest recessive-free BFI bull in the breed, proudly holding the #3 spot for BFI and SRI. His exceptional numbers speak volumes, showcasing an impressive blend of traits that make him a standout choice for any seed stock herd. With remarkably low gestation, massive carcass weight, and an impressive marble score of +4, combined with a fineness of +0.71, U1945 is truly the complete package.

As of the catalogue printing, U1945 is successfully collecting viable fresh semen, though it is not yet freezing due to his current stage of maturity. Please note, the condition of this sale includes a guarantee for frozen semen for a maximum of 90 days from the sale date, after which the sale will be void. U1945 is also qualified for export to the USA, Canada, and the EU.

Macquarie Wagyu Discovery is a unique opportunity to acquire the only Polled G113 sire genetics currently available in the world. His sire G113 is already a breed legend and carcass data shows his progeny are also breeding on. His dam Bar R F104 comes from Jerry Reeve's Bar R program, renowned for producing high marbling genetics, and was selected for her impressive phenotype, size and maternal qualities.

Discovery progeny are already in feed programs in USA with carcass data expected 2025 and there are also progeny on the ground in Australia this year. His Breedplan EBVs are extremely well balanced and he is recessive free.

He weighed 650 kg at 24 months of age. Export straws are stored at Brushy Creek, USA and Rocky Repro, Australia.

Reliable was a stand out since a calf and is the result of the combination of our super sire Mayura L0010 and our leading female Mayura L0082. Both of Reliable's parents are sired by the legendary Mayura Itoshigenami Jnr himself. He is an outlier with his superior genomics and free of all genetic disorders! We think that much of this young bull we collected him at 14 months of age and have already A'ed him to hundreds of cows in our commercial and fullblood operation. His first progeny are exceptional!! Both his parents have great phenotype which makes sense he is what he is. Reliable does it all, maternal, growth and carcass. His straws at our previous Marle High Sale have sold to AUD\$16,000 per straw purchased by Braelea Pastoral. Reliable is the perfect example of what we have been striving for in our breeding operation at HP Wagyu and that is to produce bulls that can do it all F1, Fullblood, maternal and carcass, hence the name Reliable.

Stored at Rocky Repro and Brushy Creek, Texas USA.

Shinken is one of only a few leading U bulls we picked out to collect and use in our herd. He is the highest genomic son of the outcross sire Genjiro that is a proven carcass performer but also breeds great females. Shinken's dam is a full flush sister to Mayura Notorious's mother. Shinken is free of all disorders and provided incredible balanced genomics which we at HP Wagyu strive for that brings maternal and carcass. He is a great outcross bull bringing the rare Okutani maternal line also.

Q0291 promised so much and is now delivering – carcass data averaging over DMS 11 and all AUSMB 9. He is breeding royalty. He carries that rare combination of proven marbling, maternal and growth traits on both sides of his pedigree from the leading genetics in the Macquarie Wagyu herd, G113 and Y408.

The Wagyu Breedplan database ranks Q291 as the top recessive free sire with carcass data for the combination of the moneymaking traits of marble score, carcass weight and marble fineness. This is complemented by top 1% EBVs for all Breedplan indices Q0291 weighs over 950 kg and is tested free from all genetic conditions. He has retained the conformation, temperament and swagger from his famous father.

Straws are stored at Rocky Repro (export qualified to the USA and South Africa) and also at Brushy Creek USA.

Triumph is another very exciting up and coming young sire at HP Wagyu. Once again reflecting what we are striving to breed at HP Wagyu, high performance balanced animals that have it all. He is sired by one of Macquarie Wagyu's renowned sires N100, N100 is by G113 out of a Y408 dam. We think N100's progeny are some of the nicest phenotype animals in our herd with a great temperament also. T0190's Shigeshigetani dam L0032 is one of our best flushing doner cows at HP Wagyu and she is performing extremely well in our carcass operation for MS and EMA. Mayura Precision (who is a son of L0032) graded his first carcass through the Mayura operation with an average digital marble score of 12.4, 127.7EMA and 427kg HSCW. This young bull has incredible balanced GEBVS. He has already had international interest with Wilders Wagyu purchasing his US semen rights.

Semen available for domestic use only. Stored Rocky Repro

Proven Performance, Power and Predictability. First offering of G113 straws since Marble High sale 2022 so it is truly a rare opportunity. G113 has proven to be one of the most dominant sires in Australian Wagyu history. He is still the most profitable carcass sire in the Macquarie Wagyu program with his powerful combination of marbling and carcass weight.

He is a truly set and forget sire, renowned for his easy calving, above average weaning weights and the quiet temperament he breeds on. Plus as a bonus he is free from all known genetic disorders

He is a trait leader on Breedplan in Marbling, Carcass weight and Marble Fineness and is the highest ranked high accuracy Wagyu sire in Breedplan when combining SRI, BFI, Marble Score and carcass weights EBVs - the money making traits.

His progeny are performing to his lofty standards. G113 daughters average 9.7 DMS on MIJ camera from their own progeny carcass data while his sons are also proving to produce well above average carcasses from limited data so far.

Progeny from G113 are considered hot property.

Invest in your wagyu future with confidence using the ultimate all round sire.

Straws are export qualified to the USA and South Africa and stored at Rocky Repro and Brushy Creek in the USA.

We have always loved the temperament and length of this bull since a calf and had hoped he was going to turn into a great sire one day. Our hopes came true this year when Sanjinami Doi proved himself leading our F2 progeny test, topping the marbling with a average digital marble score of 10.35 on the MIJ with the highest a 15.54, this is exceptional on F2's from a brahman base. We along with others can report Sanjinami Doi's progeny have great temperament, type with length and his females are very feminine. Sanjinami Doi is in the top gestation length with 80% and his sire Mayura ADBFD0482 has a huge 18.1 EMA (second highest bull on breedplan) with 96% accuracy, +3.1 for retail beef yield 89%, 2.8 marble score 96% and a +.049 with a 91% accuracy.

This breeding combination of Itoshigenami JNR and Shigeshigetani has consistently produced some of the highest quality carcasses in the Mayura program. His dam ADBFL0032 is one of the first females we purchased from Mayura back in 2017, she consistently our most prolific flusher out of all our elite females. She is also a descended from the Chiyotake family which is from the Shigekazu cow line which is known for consistent carcass quality and excellent marbling. Recent carcass data on Precision has come in with prolific marbling and he is averaging 427kg (941lb) carcass with a digital marble score of 12.4 and a huge 127.7cm EMA on the MIJ camera, this data has shot his genomic marble score and EMA up on breedplan. Currently his dam L0032 is averaging above a digital marble score of 10 through both our and Mayura's carcass data. Precision's Granddam has produced 2 Carcasses with an Ave MS of 10, EMA 94, HSCW 408kgs (900lb), EMA in top 1%, Ave 342 DOF. Precision having Itoshigenami jnr as his sire and L0032 as his dam, he has marbling imbedding in his DNA. Stored Rocky Repro, TLG and Brushy Creek USA

A great opportunity to acquire straws from the renowned sire from Macquarie wagyu in Y408. A foundation sire in the Macquarie Wagyu program he has bred some of the most influential sires and dams in Australia over the last 10 years. His carcasses have consistently performed in the top 3 in the Macquarie Wagyu program where he is renowned for his high marbling, excellent fineness and above average HCWT.

His sons and daughters used in our breeding program consistently perform above the average with their own progeny carcass data. These straws are rarely available for sale and offer an opportunity to lift herd improvement with a high degree of confidence. Semen is stored on farm at Macquarie Wagyu and is for domestic use only.

LIVESTOCK AUCTION TERMS AND CONDITIONS OF SALE

CHAPTER ONE - PRELIMINARY

1. (a) A vendor is bound by these terms and conditions by offering livestock for sale by auction.
 - (b) An agent (which includes an auctioneer) is bound by these terms and conditions by conducting an auction sale.
 - (c) A buyer is bound by these terms and conditions by bidding at auction.
 - (d) Competition and Consumer Act (Cth) 2010
- It is unlawful for parties that are, or otherwise would be, in competition with each other to make, or give effect to, a contract, arrangement or understanding that contains a provision relating to:
- i. price-fixing; or
 - ii. restricting outputs in the production and supply chain; or
 - iii. allocating customers, suppliers or territories; or
 - iv. bid-rigging; or
 - v. collusive bidding.

Large fines and other sanctions may be imposed for unlawful conduct.

2. (a) In these terms the expression auctioneer, agent, buyer and vendor respectively includes the servants, contractors and agents of each of them. The auctioneer, agent, buyer and vendor shall be wholly responsible for the acts and omissions of their respective servants, contractors and agents. The term "auctioneer" includes, so far as the law and context permits, the vendor's agent.

(b) When used in these terms the expressions "companion animals" means all animals originating from the same property on a particular day. Where lots are split and sent to multiple establishments, then all of these animals shall be regarded as companions.

3. The following applies in interpreting these terms and conditions:

(a) The following words have the following meanings:
Fees means all levies, charges, fees, costs and other expenses incurred or relating to these terms and conditions and the sale and purchase of livestock including, without limitation, transaction levies, yard and weigh dues, cartage, advertising and rebates, and whether paid for, or incurred, by the agent;

Livestock means animals auctioned pursuant to these terms and conditions; and

Price means the amount at which the lot has been sold to the buyer referred to in clause 7 of these terms and conditions

- (i) plus any Fees and other expenses incurred in relation to the purchase of livestock that are payable by the buyer; and
- (ii) plus any GST added in accordance with clause 12.

(b) These terms and conditions are subject to legislation or regulation in the State in which the auction is conducted and in the event of any conflict then the legislation or regulation will prevail. The provisions of these terms and conditions are in addition to, and do not derogate from, the duties and rights of vendors, agents and buyers set out in legislation and regulation in the State in which the auction is conducted.

CHAPTER TWO - STANDARD TERMS OF SALE

4. Subject to any reserve price, and to the right, prior to the fall of the hammer, of the vendor to withdraw any lot without declaring the reserve, the highest bidder shall be the buyer.

5. The auctioneer has the right to bid on behalf of the vendor provided that right is notified prior to the commencement of the sale and is subject to State law.

6. A bid cannot be made or accepted after the fall of the hammer unless, in accordance with clause 8, the auctioneer decides to put the lot up again.

7. Prior to the fall of the hammer the auctioneer shall announce the last bid and receive any further bids. The last price called by the auctioneer at the fall of the hammer shall be the amount at which the lot has been sold.

8. In the event of a disputed bid, the auctioneer is the sole arbitrator of the successful bidder or the auctioneer may decide to put the lot up again. The auctioneer's decision is final.

9. The auctioneer may refuse to accept any bid which, in the auctioneer's opinion, is not in the best interest of the vendor and need not give reasons for doing so.

10. A bidder shall be deemed to be a principal unless, prior to bidding, the

bidder has given to the auctioneer a copy of written authority to bid for or on behalf of another person.

11. The successful bidder at a livestock auction sale must give to the auctioneer at the fall of the hammer:

- (a) the purchaser's name; or
- (b) the bid card number which identifies the purchaser; or
- (c) the name of the person on whose behalf the successful bid was made; and
- (d) the Property Identification Code (known as the "PIC") of destination.

12. The auction shall be conducted on the basis that the bid price shall be exclusive of Goods and Services Tax (GST). GST shall be added after the fall of the hammer for those sales subject to GST.

13. The vendor warrants;

(a) That the vendor has (or will have) the right to sell the livestock at the time of delivery; and

(b) That the purchaser will obtain title on completion of the purchaser's obligations under this contract including payment.

14. If a buyer does not comply with any of these terms and conditions, which includes the requirements of State law, any livestock knocked down to that buyer may be re-sold by public auction or private contract in whatever lots and manner the auctioneer decides. The re-sale may be with or without notice and shall be at the buyer's risk. The buyer is responsible for all loss and expense arising out of a re-sale and is not entitled to any resulting profit.

15. The buyer of livestock must pay the agent the full amount of the purchase price in immediate funds on receipt of a tax invoice. Payment is required prior to delivery unless some other time for payment is specified in an agreement between the buyer and the auctioneer that was made before the fall of the hammer. If, before delivery, payment has not been made then clauses 20 to 23 apply.

16. No person may bid unless, prior to the commencement of the sale, that person has made arrangements satisfactory to the auctioneer for payment for livestock purchased. If bids in breach of this condition are inadvertently accepted, delivery shall not be given until the purchase money is paid and any law, rule or practice to the contrary is accordingly negated as far as possible.

17. (a) Cattle sold on a liveweight basis that are weighed pre-sale are at the risk and expense of the buyer upon the fall of the hammer.

(b) Cattle sold on a liveweight basis that are weighed post-sale are at the risk and expense of the buyer immediately after weighing.

(c) All livestock other than cattle sold on a liveweight basis are at the risk and expense of the buyer upon the fall of the hammer.

18. (a) Subject to this clause the sale is complete on the fall of the hammer.

(b) The time for rejection is the time commencing at the fall of the hammer and ending at the first of:

- (i) delivery is taken by a representative of the buyer;
- (ii) departure of the animal from the purchaser's delivery pen; or
- (iii) one hour after the last animal is:
 - a. in the case of pre-sale weighing, sold; or
 - b. in the case of post-sale weighing, weighed.

(c) During the time for rejection the buyer may reject any animal which is lame, blind or diseased where that condition existed prior to the fall of the hammer but could not be reasonably observed when the animal was in the selling pen.

(d) If the purchaser rejects an animal during the time for rejection then the sale of that animal is cancelled and the animal is returned to the vendor or sold on such terms as any buyer and the agent may agree, after the agent has disclosed the reason for rejection to that buyer.

(e) This subclause applies only to cattle which are sold in Queensland at auction for slaughter. The agent has responsibility for the prevention of loss or escape (but not death, sickness or injury) of those cattle from the time of the fall of the hammer, for delivery to and from the scales, to the buyer's delivery pen and onto the buyer's nominated transport. This responsibility ends at the earlier of those cattle boarding the buyer's nominated transport or sunset on the day after the sale. This subclause does not apply if the agent makes an announcement to that effect prior to sale.

19. (a) Subject to the right of rejection in Clause 18, all conditions and

LIVESTOCK AUCTION TERMS AND CONDITIONS OF SALE

warranties expressed or implied by law are hereby excluded from the sale to the extent that the law allows. All lots are open for inspection prior to the commencement of the sale and are sold with all faults, if any. No compensation shall be given for any faults, imperfections, errors of description, number in or of any lots sold or otherwise.

(b) Any claim or objection arising out of an error or misdescription in the provision of relevant information in terms of legislation or regulation concerning the National Livestock Identification Scheme (NLIS) must be made by 5:00pm on the seventh day after the fall of the hammer. No objection, requisition or claim against the vendor or agent in respect of such error or misdescription can be made after that time.

(c) Any statements made by the vendor or the auctioneer whether in writing or orally to the effect that any female has been pregnancy tested or scanned positive shall mean and require only that a certificate in writing shall be supplied to the buyer signed by a qualified veterinary surgeon or certified scanner certifying that the said female has been tested or scanned on the date specified in the certificate and that in the opinion of the surgeon or scanner was pregnant on that date.

(d) For slaughter cattle, the agent undertakes to make every reasonable effort to ensure that any NLIS cattle device number is transferred from the saleyard PIC to the purchaser's PIC on the NLIS database no later than midnight on the day of the sale.

(e) For other slaughter livestock the agent undertakes to make every reasonable effort to ensure that the NLIS information is transferred from the saleyard PIC to the purchaser's PIC on the NLIS database no later than midnight on the day of the sale.

(f) Where livestock have a food safety or market eligibility status derived from the National Vendor Declaration (NVD) and/or the NLIS/ERP database, the agent will inform the buyers by presale catalogue and/or announce the status prior to the offering of those lots.

20. If delivery is made to, or possession obtained by, the buyer or its representative before full payment of the Price, then until full payment is received, the buyer:

- (a) does not acquire title to the livestock;
- (b) holds the livestock as bailee only for the vendor;
- (c) must act in a fiduciary capacity in its relationship with the vendor;
- (d) must store the stock separately or so that they are readily distinguishable from other livestock owned by the buyer;
- (e) is responsible for the safety and well being of the livestock;
- (f) may make a bona fide sale for market value of any or all of the livestock. As between the buyer and the subsequent buyer, the sale shall be made by the buyer in its own name and not as agent for the vendor, however as between the vendor and buyer, the sale shall be made as bailee and agent for the vendor; and
- (g) must keep and account for the proceeds of any subsequent sale separately from its other money and hold those proceeds, together with the benefits of any rights against subsequent buyers, on trust for the vendor.

21. The purchaser agrees that:

- (a) Clause 20 creates a registrable security interest under the Personal Property Securities Act (Cth) 2009 (PPSA);
- (b) the Purchaser acknowledges the rights of the Seller (and/or the Agent if Clause 25 applies) to register a financing statement under the PPSA with respect to the security interest created by this clause;
- (c) the Livestock are collateral for the purposes of the PPSA;
- (d) to the extent permitted, the Purchaser waives any right the Purchaser has under the PPSA to receive notices; and
- (e) the date upon which the security interest created by this clause comes into force is the first date on which livestock are delivered pursuant to this contract

22. The buyer may not make any claim against the vendor for actions by the vendor or its agent under clauses 20 or 21 and indemnifies the vendor and its agent against any loss, damage, costs, expenses, penalties, fines or claims suffered by the vendor, the agent or any person or entity arising from the vendor exercising its rights under clauses 20 or 21.

23.1. Clause 23 applies whenever the agent pays the vendor before being paid by the buyer, which the agent is not bound to do. The agent is then the del credere agent of the vendor at law.

23.2. The vendor hereby gives notice to the buyer of the assignments referred to in clause 23.3.

23.3. When this clause applies, in addition to any rights of the agent that arise by operation of the law, the parties agree that, subject to clause 23.5 the agent is subrogated to all rights of the vendor under these terms and conditions against the buyer.

23.4. The vendor acknowledges that the agent may take enforcement, repossession or other action to recover any livestock for which the buyer has not paid in full, or the Price of such livestock, owing by the buyer under these terms and conditions:

- (a) when this clause does not apply, as agent of the vendor (including by reselling the livestock); and
- (b) when this clause applies, on the agent's own behalf exercising the rights of the vendor by subrogation or assignment under these terms and conditions (whether in the vendor's name or not) and, where title to the livestock has not passed to the agent, by selling the livestock as agent of the vendor without the agent having to account to the vendor for the proceeds of sale.

23.5. The agent may at any time, assign, transfer, securitise or otherwise dispose of all or any of its rights under these terms and conditions and any debts created pursuant to it (including, without limitation, the rights assigned to it under clause 23.3).

23.6. The vendor hereby irrevocably appoints the agent as the vendor's attorney to:

- (a) do at any time and in any manner as the agent thinks fit all acts necessary or desirable to perfect or improve the rights and interests afforded, or intended to be afforded, to the agent under these terms and conditions; and
- (b) appoint one or more sub-attorneys to do anything that the agent may do as the vendor's attorney.

23.7. These terms and conditions do not render the agent liable to the buyer as vendor nor entitle the buyer to set off against the agent any right the buyer may have against the vendor or otherwise.

23.8. The buyer acknowledges that the provisions of this clause 23 are intended solely for the benefit of the agent (and its assigns) and the vendor. The liabilities and obligations of the buyer will not be in any way affected:

- (a) by this clause 23, other than as it expressly provides; or
- (b) by the failure of the agent or the vendor or either of them to comply with the terms of this clause 23.

23.9. The buyer must pay all amounts payable to the vendor or the agent under these terms and conditions without any deduction, withholding, set off or counterclaim whatsoever, whether the benefit of a deduction, withholding, set off or counterclaim is alleged to exist in favour of the buyer as against the vendor or the agent in any capacity whatsoever or any other person including any assignor of the vendor's or the buyer's interests under these terms and conditions.

24. (a) The agent agrees that he is liable to pay to the vendor the Price, less such commission as is agreed between the vendor and the agent, and in the absence of any agreement such amount as is reasonable, and less the Fees that are payable by the vendor that were incurred by the agent on behalf of the vendor in relation to the sale of the livestock. (b) In the event that the buyer pays the Price or part of it direct to the vendor then the agent has no liability to the vendor for the amount of such payment. Further, if the agent pays the vendor any amount which the buyer also pays direct to the vendor in respect of the same livestock, then the vendor must repay the agent that amount and the agent may debit that amount to an account held in the name of the vendor by the agent.

(c) Regardless of whether or not a sale has occurred the agent may, but is not under obligation so to do, instead of deducting payments owed to it by the vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent.

25. (a) The auctioneer has been retained by the vendor as auctioneer for the purpose of selling the livestock comprised in the lots. The terms of engagement between the auctioneer and the vendor do not extend to the provision of advice by the auctioneer to the vendor in relation to the safety or otherwise of the sale ring, the saleyards and the surrounding environments.

(b) The vendor, the agent and the buyer agree to comply with their

several duties under the Australian Animal Welfare Standards and Guidelines for the Land Transport of Livestock and further to consign, manage, receive, transport and handle livestock in accordance with any other or additional requirements of animal welfare legislation specific to the jurisdiction in which livestock are consigned, managed, received, transported and handled in the course of the auction process.

26. This chapter applies only in the case of livestock and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the livestock are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the livestock to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.

27. The warranty of a vendor is that livestock and their companion animals offered for sale at auction:

- (a) pass government and other regulatory authority requirements and inspections at the time of slaughter;
- (b) are of merchantable quality;
- (c) carry an NLIS device in accordance with State law;
- (d) in the case where a representation has been made in the pre-sale catalogue that the livestock have particular characteristics or are fit for a particular purpose or market, and such representations are based on information in any document, the livestock will have those characteristics or will be fit for the particular purpose or market; and
- (e) all information in any document provided by the vendor is true, complete and correct in all material respects.

28. In the event of a breach by the vendor of the vendor's warranty and provided such breach is notified by the buyer to the agent by 5:00pm on the 7th day after the fall of the hammer then the buyer is not liable to pay the portion of the Price of such of the vendor's livestock to which the breach applies.

29. However if the breach by the vendor is such that the livestock are not rejected outright but are instead downgraded then the buyer will pay the value of the livestock at their next highest and best use.

30. In the case of a breach by the vendor of the vendor's warranty then the vendor will also be liable to the buyer for any further losses which the buyer might establish but the buyer will take all reasonable steps in co-operation with the agent and vendor to mitigate both the effect of the breach and the amount of any loss.

31. Where a sentinel animal of a lot tests positive for chemical residue, or foreign material contamination and provided such test is certified and notified as required by these vendor warranty terms, then:

- (a) the buyer will be entitled to delay payment for the price of all livestock in that lot only; or
- (b) the vendor has the option, at the vendor's cost, of collecting the companion animals, if allowed by law; or of having the livestock slaughtered in which event the risk of further condemnations will be that of the vendor. Where product integrity is potentially jeopardised, the Processor has the right to refuse slaughter and send the livestock back to the consigning property at the vendor's cost.

32. The auctioneer is liable to the buyer in respect of any breach of the vendor's warranty arising out of:

- (a) any error, by the auctioneer, of transcription of information from the NVD completed by the vendor to the pre-sale catalogue or the buyers post-sale summary;
- (b) any failure by the auctioneer to notify the buyer, prior to bidding, of any breach by the vendor of the warranty of the vendor if the buyer establishes that the agent knew of such breach prior to the sale; and
- (c) any failure by the auctioneer to announce prior to bidding, or disclose in the pre-sale catalogue, that the vendor has failed to provide a NVD that is complete in all material aspects.

CHAPTER FOUR - OWNERS RISK FOR CONDITION OF CATTLE

33. This chapter applies only in the case of cattle and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the cattle are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells cattle to a slaughterer.

A slaughterer is any person who pays the AMPC Processor levy.

34. Owners risk reflects the producer's responsibility to provide slaughter cattle for sale that are fit for human consumption. Cattle are fit for human consumption if they are not condemned as unfit by government. Owners risk applies if the condemnation is due to a condition in the animal which the buyer establishes, by the relevant government certificate, existed prior to the fall of the hammer.

35. A buyer with the benefit of owners risk protection is not liable to pay the Price of that animal to the vendor. The buyer remains nevertheless liable for all costs incurred after the fall of the hammer in transport, slaughter, testing and disposal of the animal.

36. Owners risk protection is available to the buyer of cattle to which this chapter applies if all of the following are satisfied:

- (a) a certificate is issued by government which states the relevant NLIS RFID tag number and PIC, the date of the certificate, the reason for condemnation and that the reason for condemnation existed prior to the fall of the hammer;
- (b) the certificate is received by the selling agent either in its original form or by fax or electronic communication in the form of data, text or imaging by 5:00pm on the 7th day after the fall of the hammer; and
- (c) if the condemnation is due to chemical residue the certificate follows testing in a government approved laboratory which establishes maximum residue limits in excess of the Australian limit.

37. Owners risk does not apply, and the buyer must pay for the cattle, if the reason for condemnation is any of bruising, fever, partial condemnation or emaciation.

CHAPTER FIVE - NOTICES REQUIRED BY LEGISLATION

NSW Property, Stock and Business Agents Act 2002 Warnings

Penalties for collusive practices. It is an offence against the Property, Stock and Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:

- (i) to abstain from bidding; or
 - (ii) to bid to a limited extent only; or
 - (iii) to do any other act that might prevent free and open competition.
- Severe penalties may be imposed on persons convicted of collusive practices.

The auctioneer has the right to make one bid on behalf of the vendor if the auctioneer clearly and precisely announces that fact prior to the sale.

Tasmania Legislation. An auctioneer conducting a public auction must not appear to acknowledge the making of a bid if no bid was made. A person must not participate in collusive practices by way of making or receiving an unlawful promise to abstain from bidding, not to bid except to a limited extent or do any other thing which may prevent free and open competition.

WA Auction Sales Act 1973 s31 NOTICE.

It is an offence to:

- (i) induce or attempt to induce another person to abstain from bidding by means of a promise, expressed or implied, that the other person will have the right to elect to take over as buyer or to toss or draw lots to establish who is to become the owner;
- (ii) abstain or agree to abstain from bidding as a result of such a promise;
- (iii) knowingly enter or permit or cause to be entered in the auctioneer's record any name other than that of the actual successful bidder;
- (iv) enter in the auctioneer's record the name of the buyer other than that of the actual successful bidder; or
- (v) in the case of successful bidder supply wrong information as to the name of the buyer to the auctioneer or to any person, firm or corporation on whose behalf the sale is conducted.

The vendor, or any person on behalf of the vendor, or the auctioneer have the right to make no more than three bids.

THANK YOU

MARBLE
20 HIGH WAGYU
24 SALE
